## Made in Various Sizes

The Stamp Truckmixer can be obtained for various sizes and makes of trucks. It replaces the dump body with no changes on the truck chassis, and installation can be made in a few hours.

The material and workmanship are of the best — no detail of construction which conduces to efficiency and service has been overlooked. Write for further information.

Patent Protection — The general design of the Stamp Truckmixer, its method of operating and many of its features are covered by patents pending, and infringements will be vigorously prosecuted.
